Minimum Gas inlet : 3.5 Bar g (50 psig)
Maximum Gas Inlet : 280 Bar g (4,060 psig)
Maximum Gas Outlet : 1034 Bar g (15,000 psig)
Maximum Recommended CR : 36:1

To determine required cycling speed:
1. Draw horizontal line representing required outlet flow
2. Draw vertical line representing the gas supply pressure available
3. Where both lines cross will give the approx. cycling speed of the H-Drive

For full operating parameters of H-Drive running at particular conditions including the hydraulic power supply required, contact factory or distributor with following data:
- Ps Gas supply pressure
- Po Gas outlet pressure
- Qo Outlet flow required
- Gas being transferred
- Details of the application
